Lucknow, Uttar Pradesh | +919569146149 | sakshianujay341@gmail.com | [LinkedIn](#) | [Github](#) | [Hackkerrank](#) | [Kaggle](#) | [Leetcode](#)

EDUCATION

MCA- SRM Institute of Science and Technology, Kattankulathur, Tamil Nadu (expected Jun 2026) **9.48**

BSc - Lucknow Christian Degree College, Lucknow (Sep 2021 – Jun 2024) – **7.48**

INTERMEDIATE- Radiant Central Academy, Ambedkar Nagar (2021) **92.2%**

HIGH SCHOOL- Radiant Central Academy, Ambedkar Nagar (2019) **93.4%**

SKILLS

Programming Languages: Python, SQL, C, C++, Java, R

Machine Learning & Data Science: TensorFlow, Scikit-Learn, Pandas, Numpy, Matplotlib, Seaborn, Excel, Keras, Pickle

NLP & AI: nltk, LangChain, AI Agent Development, RAG Applications, LLMs

Web Development & Tools: HTML, Css, Streamlit, Gradio, GitHub, Flask

Data Visualization: Matplotlib, Seaborn, Pyplot, Power BI, Excel, Tableau

Deep Learning: Neural Networks (CNN, RNN, LSTM, Transformers), Image Processing, Computer Vision, GenAI

Business Intelligence: Data-driven decision-making, BI, Insight Generation

Internship

AI Intern – Microsoft x AICTE x Edunet Foundation | Remote | Apr 2025 – May 2025

- Completed Microsoft Azure AI learning paths (Computer Vision, NLP, GenAI).
- Built a CNN-based Plant Disease Detection system using Streamlit & PlantVillage dataset (87K+ images).
- Gained practical experience with Azure AI services and real-world AI deployments.

PROJECTS

NeuraMate – AI Chat Assistant [Live demo](#)

Technologies: Streamlit, Python, OpenRouter API, NLP

Use: Built a role-based AI chatbot (e.g., Study Assistant, Therapist) with LLM-powered responses, persona switching, and session tracking. Deployed on Streamlit Cloud with a modular, responsive UI.

Movie Recommender System [Live demo](#)

Technologies: Python, Streamlit, scikit-learn, TMDb API

Use: Recommends top-5 personalized movies using content-based filtering with cosine similarity; fetches posters via TMDb API; deployed with a user-friendly Streamlit interface.

House Price Prediction App [Live demo](#)

Technologies: Python, Scikit-learn, Pandas, Matplotlib, Render

Use: Developed and deployed a regression-based ML model to predict housing prices using real-world data.

Plant Disease Detection System (Edunet internship) [LINK](#) [Live demo](#)

Technologies: Python, TensorFlow, Keras, Streamlit, NumPy, Pandas

Use: Built a Streamlit web app using a CNN (TensorFlow/Keras) trained on 87K+ images to detect 38 plant diseases, enabling early and accurate diagnosis to help reduce crop loss

Fashion MNIST Image Classification (FCNN) — (Intellipaat Project) [LINK](#)

Technologies: Python, TensorFlow, Keras, Streamlit

Built a fully connected neural network using TensorFlow & Keras to classify images into 10 fashion categories; deployed as a Streamlit web app for real-time predictions enables automated fashion item classification from images.

Cat vs. Dog Classification (VGG16 Transfer Learning) [LINK](#)

Technologies: Python, TensorFlow, Keras, VGG16

Built a classifier using VGG16 and custom dense layers with data augmentation, achieving ~90% accuracy on cat/dog images; real-time predictions with confidence scores used to differentiate pet images for automated labeling or app use.

Use: COVID-19 Trend Forecasting [LINK](#)

Technologies: Python, Pandas, Facebook Prophet

Forecasted COVID-19 daily cases with 90% accuracy using Facebook Prophet; generated trend plots to

support healthcare planning and resource allocation which aids public health decision-making through case prediction.
